Biodiversity is not evenly distributed, rather it varies greatly across the globe as well as within regions. Among other factors, the diversity of all living things depends on temperature, precipitation, altitude, soils, geography and the presence of other species. The study of the spatial distribution of organisms, species and ecosystems, is the science of biogeography.

Unlike other meal replacement shakes, Shakeology claims it aids in weight loss, improves digestive function, and boost immune health, to name a few. Apparently, it does this by including plenty of superfoods, phytonutrients, and more in their formula. Although some these ingredients have shown to improve health, like coconut and brown rice protein, their effects on weight-loss are controversial.

For the vast majority of science fiction worldbuilding, the major alteration to the laws of physics is allowing some species of faster-than-light propulsion for their starships. Others will add things like psionics/psychic abilities. But besides those, the rest of the laws of physics operate exactly as in real life.
