Grade inflation is used in two senses: (1) grading leniency: the awarding of higher grades than students deserve, which yields a higher average grade given to students; and (2) the tendency to award progressively higher academic grades for work that would have received lower grades in the past.. This article is about grade inflation in the second sense.

A metalloid is a type of chemical element which has properties in between, or that are a mixture of, those of metals and nonmetals. There is neither a standard definition of a metalloid nor complete agreement on the elements appropriately classified as such. Despite the lack of specificity, the term remains in use in the literature of chemistry.. The six commonly recognised metalloids are boron ...

Other alleged evidence for modern pterosaurs includes artifacts and rock etchings of questionable origin or very subjective interpretation. What is sorely lacking, besides convincing photos of extant pterosaurs, is any reliably documented forensic or physical remains such as carcasses, bones, eggs, nests, or tracks.
